ROOM 1E | EDUCATION ISSUES AND SCHOOL ENGAGEMENT
Elie Zwiebel

We know "educational advocacy" is directly related to a holistic and complete representation, yet the black box of what "educational advocacy" means and how to do it effectively often leads attorneys to relegating it to a "collateral" status. School discipline records, placement, and special education can directly impact the way a prosecutor or judge perceives our clients and craft offers or sentences. This session aims to increase insight into how to effectively advocate for your client's educational rights, where to obtain resources that can help you, and who is available in the community to support you. Topics covered will include school safety plans, tips for effective school discipline and special education advocacy based on participant comments and questions, resources available to assist with effective educational advocacy, highlights of the legal framework of Title 22, and discussion of collateral consequences and considerations.

Led by a bipartisan, interbranch, statewide taskforce, the CSG Justice Center conducted a data-driven assessment of the juvenile justice system, from the point a youth is referred to the system through a youth's reentry into the community. Through a PowerPoint presentation, this session will share key findings from CSG's assessment, with a focus on juvenile diversion, review best practices, and learn about the policies the state plans to adopt to align diversion policies, practices, and resources with what research shows works.
